

June 24, 1985

The Codorus Township Board of Supervisors met in special session on June 24, 1985 at 7:30 P.M. Board members present were Charles Wehrly, Larry Luckenbaugh and Leroy Thoman. Approximately thirty residents from the Hill Climb Road/Chestnut Ridge areas were also present.

The purpose of this meeting was to give the residents a report on the study one by Clarence Collison, Entomologist from Penn State University. Mr. Collison had visited the area on June 19 to study the fly problem and to try and find the source of the flies and also to recommend what steps should be taken to control the flies.

Charles Wehrly, Chairman, called the meeting to order.

A typed report of Mr. Collison's study was given to each person attending the meeting. After the report was read, the residents were asked for comments.

Mrs. Oplinger stated that her property was visited by Mr. Collison, Anthony Dobrosky and Johanna Geiger. Grass clippings at her property were examined, but no flies found.

A couple of other residents stated their properties were also visited.

Supervisor Larry Luckenbaugh stated he was not satisfied with the report and would like to have something else done to find out the source of the problem.

The residents discussed the sprays recommended by Mr. Collison and wanted to know what good it would do if some farmers cooperated in a fly prevention program, while other farmers did not.

Larry Luckenbaugh made a motion to get Clarence Collison to attend a meeting of the Board of Supervisors to speak with the residents. Charles Wehrly seconded this motion. This motion passed.

The secretary will contact Mr. Collison to arrange a time for him to attend a meeting and will notify the residents of the date and time.

The meeting adjourned at 9:15 P.M. on motion of Leroy Thoman and second by Larry Luckenbaugh.

Respectfully submitted,

*Goldie Day*  
Goldie Day, Secretary
